About

I am Chaima MELKI, a QA Test Engineer specialized in CPE and broadband technologies (DOCSIS, GPON). I have strong experience in designing test cases, tracking bugs, UI and API testing, and working with tools such as Wireshark, Postman, Selenium, and Robot Framework.

Featured Projects

Project 1 — Test Cases & Automation

Examples of real test cases: TC_WIFI_001 (Wi-Fi 2.4GHz enable/disable), TC_INTERNET_003 (WAN connection flow). Includes Selenium login automation tests.

Project 2 — Bug Reports & API Validation

Sample bug reports: BUG_WIFI_017 (SSID not updating), BUG_LAN_022 (incorrect LAN link speed). API testing (TR069) including XML validation and performance checks.

Skills

DOCSIS & GPON

Wireshark / Network Analysis

Postman / API Testing (TR069)

Selenium / Robot Framework

Python & Shell Scripting

Test Management: Jira, XRay

Languages: Arabic, English, French

CV Summary

2019–Present — QA Test Engineer — Responsibilities: CPE testing, bug reporting, automation scripting.

2015–2019 — Previous QA/Technical Role — Testing, validation, and network troubleshooting.
